Temperament is of the utmost importance to us here at J-Lyn, so testing is done on EVERY litter and has been for over 25 years. This is done at 7 weeks of age because that is when the puppies have a fully developed adult brain. When done at this age, it helps to determine what each puppy's temperament has the potential to develop into. It also helps us to help you to make the VERY IMPORTANT DECISION of which puppy is right for your home according to your needs and expectations. For more information regarding temperament testing, please do not hesitate to contact us. We will be happy to discuss it with you.

All puppies at J-Lyn start their worming process at 2 weeks of age and continue with this program every two weeks until they leave for their new homes. Between 7 and 8 weeks of age, they are seen by our trusted Veterinarian for a complete physical exam, vaccinations, etc. A Health Certificate is required by the State of Florida, so none leave without one. All of our pups are very well socialized, which begins at birth and goes back to how important temperament is to us.

It is our goal to produce the very best quality of puppies possible, with health, temperament and structure at the top of our list. Of course, we always hope to have people interested in show quality animals... but, in all honesty, most of our pups are placed in companion homes with families that have children, where the dogs are part of the family. All pets/companions are sold on a limited registration (not for breeding purposes.)

We do ship, and any inquiries are welcomed so that we may help to educate those interested in the German Shepherd Dog. Thank you for your interest in J-Lyn Shepherds!

Respectfully,

Linda Novotasky
